

WELLBORN SUD

Wellborn SUD is implementing Stage 1 Water Conservation due to excessive heat and high-water demand. Most water usage during peak hours consists of automatic lawn sprinkler systems. In order to ensure enough water is available for drinking, sanitation, and to maintain system pressure, that water usage must be spread to off-peak hours. Additionally, these measures are absolutely necessary to maintain fire fighting capacity throughout the district for the health and safety for all our customers.

If District customers will comply with these instructions, further conservation methods may not be required. Please adjust your irrigation systems to comply with the watering restrictions below.

Voluntary Water Use Restrictions:

Water customers are requested to voluntarily limit the irrigation of landscaped areas to Sundays and Thursdays for customers with a street address ending in an even number (0, 2, 4, 6 or 8), and Saturdays and Wednesdays for water customers with a street address ending in an odd number (1, 3, 5, 7 or 9), and to irrigate landscapes only between the hours of 9:00 p.m. and 6:00 a.m. on designated watering days.

Water customers are requested to practice water conservation and to minimize or discontinue water use for non-essential purposes.

These simple modifications to your water usage will help us supply all the necessary water to customers while maintaining safe storage levels within the District.
